Topic: Using rwrap package in oracle to get last Command/Smt executed (Using Arrow key) w/down

\$ export ORACLE_SID = ORCL

\$ cd /tmp

\$ ls rwraptar.gz → package 101

\$ tar -xvf <filename .tar) \$ cd rwrap
↳ unzipping → \$ cd rwrap
→ ~~read~~
→ read

\$ make

\$ make install

\$ su - oracle

\$ rwrap salplus /nolog

\$ SQL> Conn / as sysdba

SQL> select sysdate from dual;

SQL> select name from v\$datafile;

SQL)

⇒ we can add an entry to basic profile of user to login as rwrap

i.e \$ gedit /home/oracle/.bashrc
alias rwrap = 'rwrap rman'
alias rwrap_salplus = 'rwrap salplus' /nolog
:wq

\$ rwrap_salplus SQL> Conn / as sysdba
